

different layer / cable type on the other ends of these cables except the first ones. You will see the errors in the cable schedule

Multi-line Offsheets fit in tight spaces
Auto Offsheets fills these in too.

Magenta means they are marked as "Planned" in the Cable Schedule

red offsheets will show up as errors
in the cable schedule

these jackfields look different to the ones in teh SDI Router drawing.
It doesn't matter what they look like, tvCAD is looking for the data.
Mostly, tvCAD does look at layer names, colors etc. as well.

Connector info is missing
from the cable schedule
in Column B for this.
The block attributes don't have the info.
The rest of the info is there,
it didn't break.

These are Analogue at the other end.
Check out the errors in the cable schedule
Columns U & AC for these cables in "Audio"

Krone. Do people still Krone ?

Auto Offsheets got all this detail from the database in one click
Well, all the offsheets on the drawings were done in one click.

Example half-drawn	Ewen	25 May 16
Most of the other half	Ewen	29.9.20

ignored by tvCAD
because it has no valid cables on it

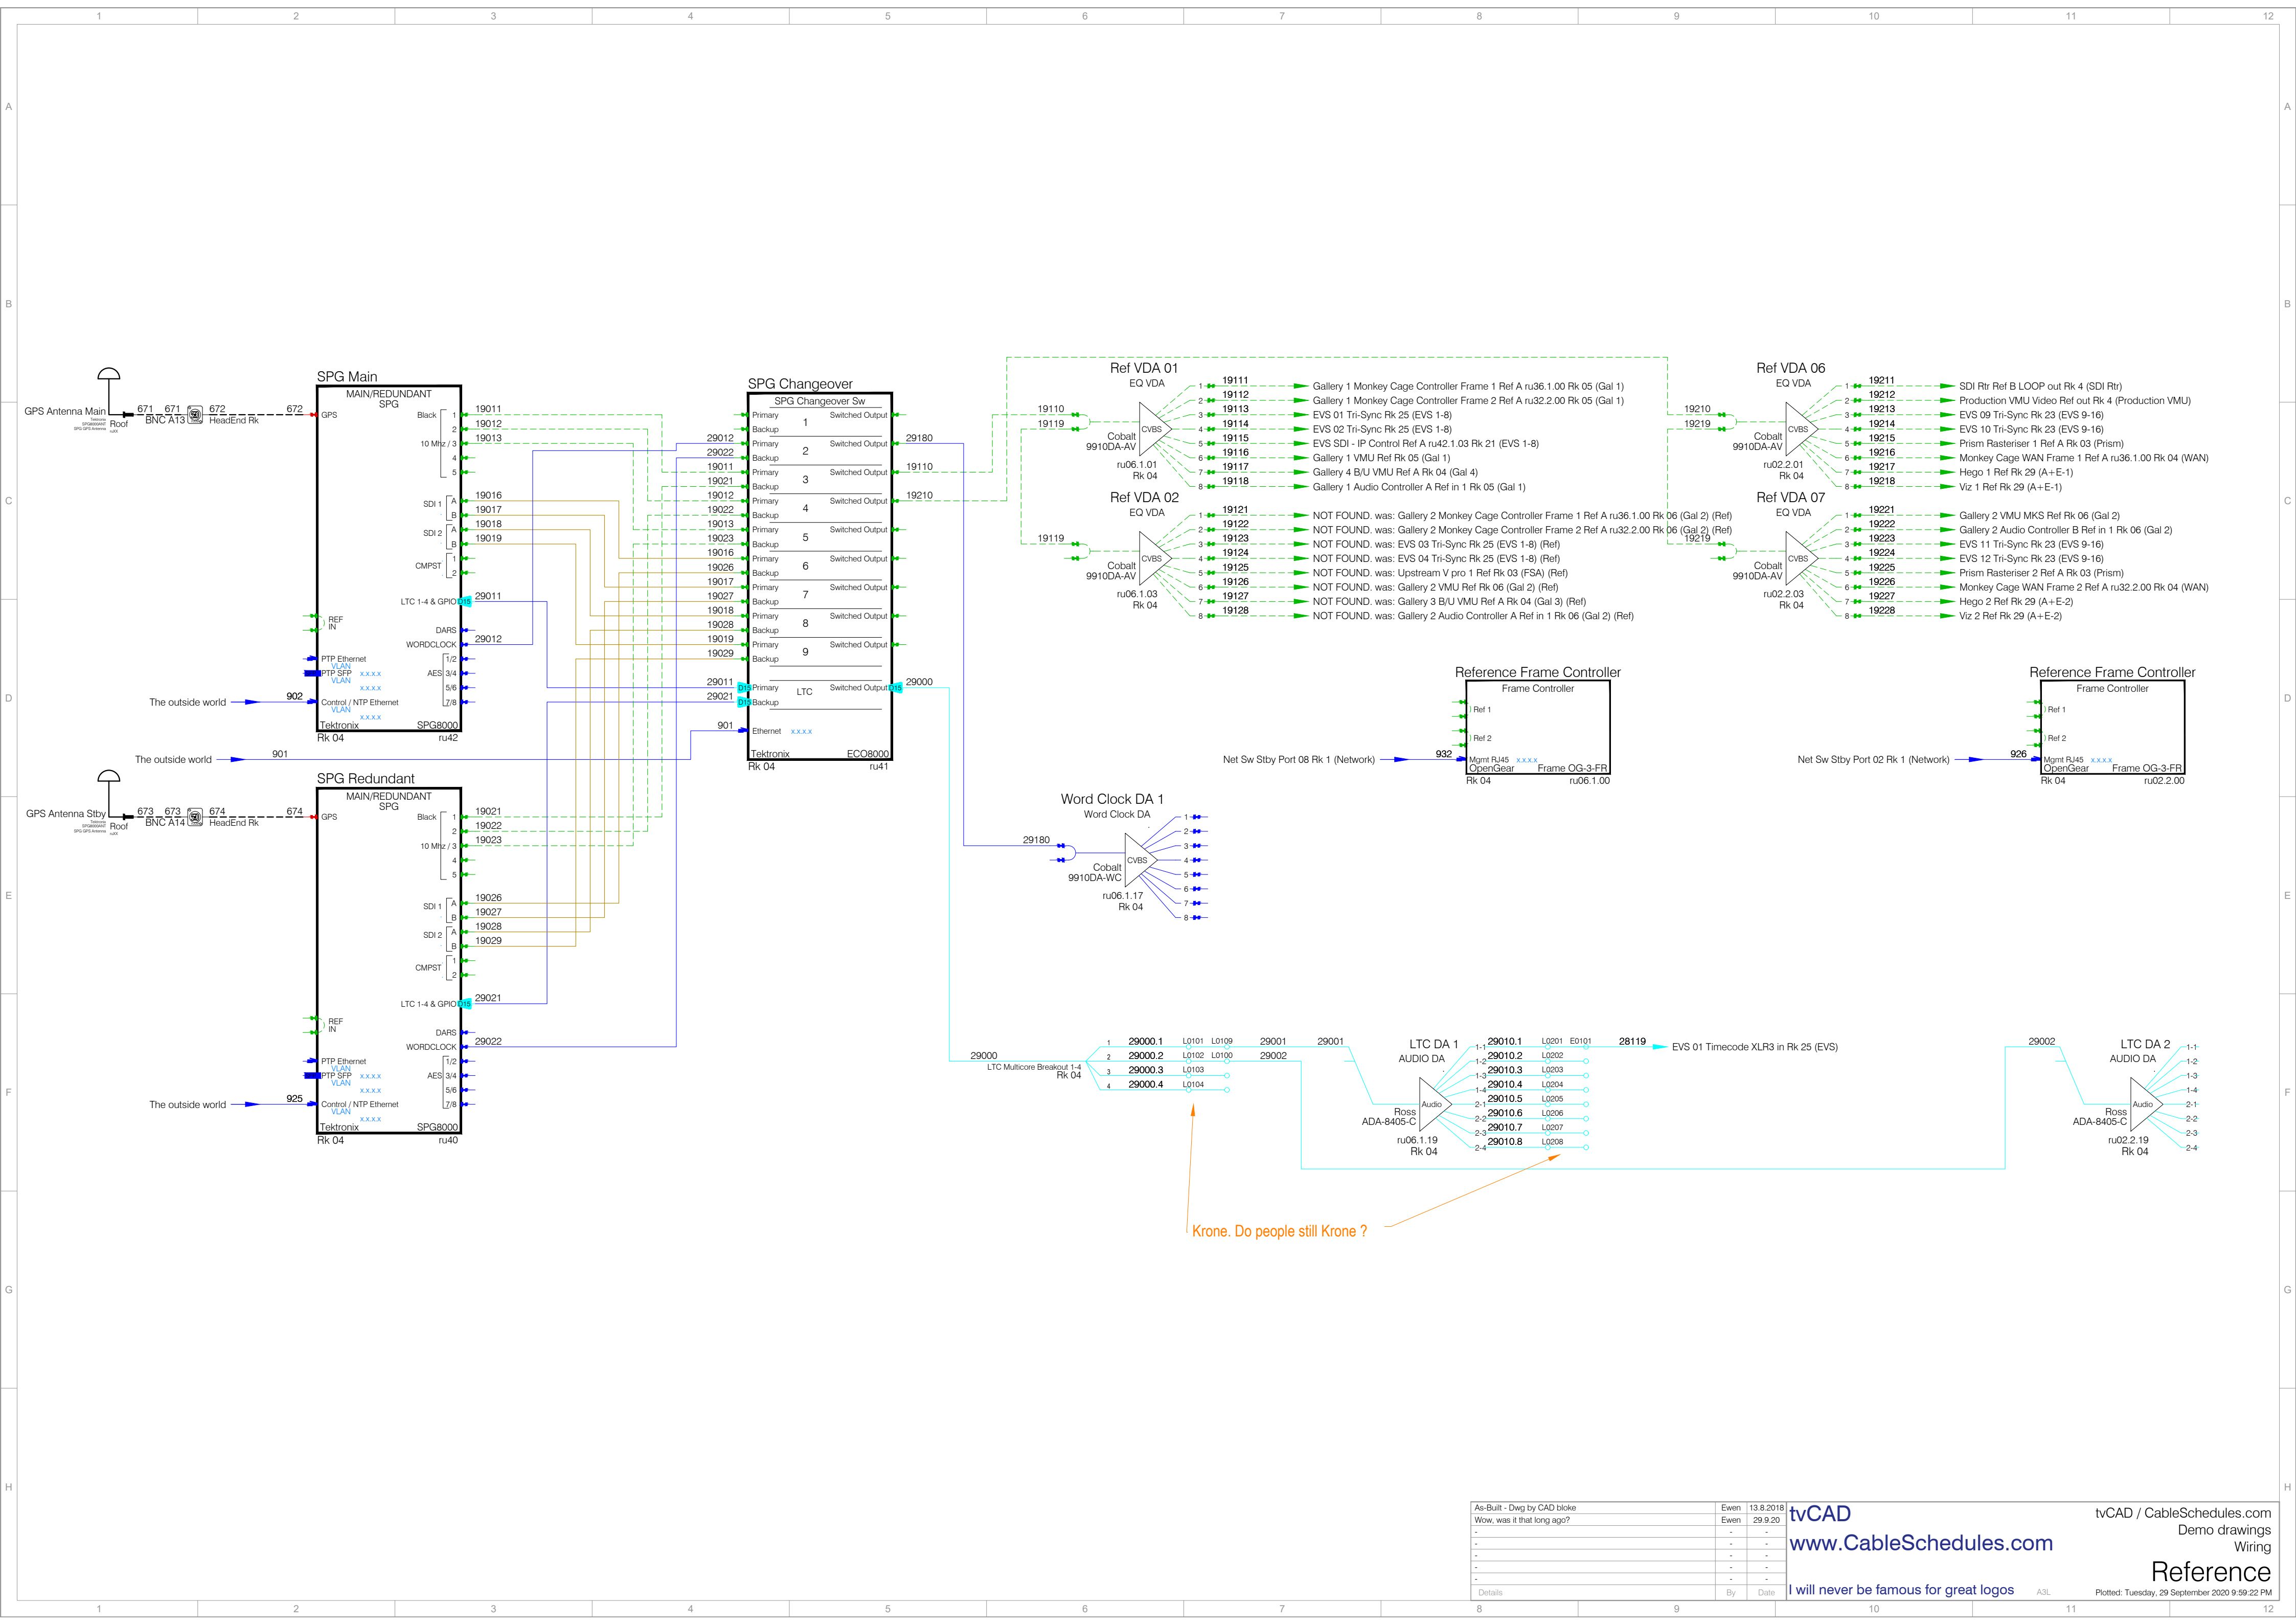

So, how do you get individual Block Attributes to be different colors?
Hold down the Control key, select all the Attributes you want to change,
change their properties in the Properties palette (Control -1)
-NOT in the ribbon or toolbars.

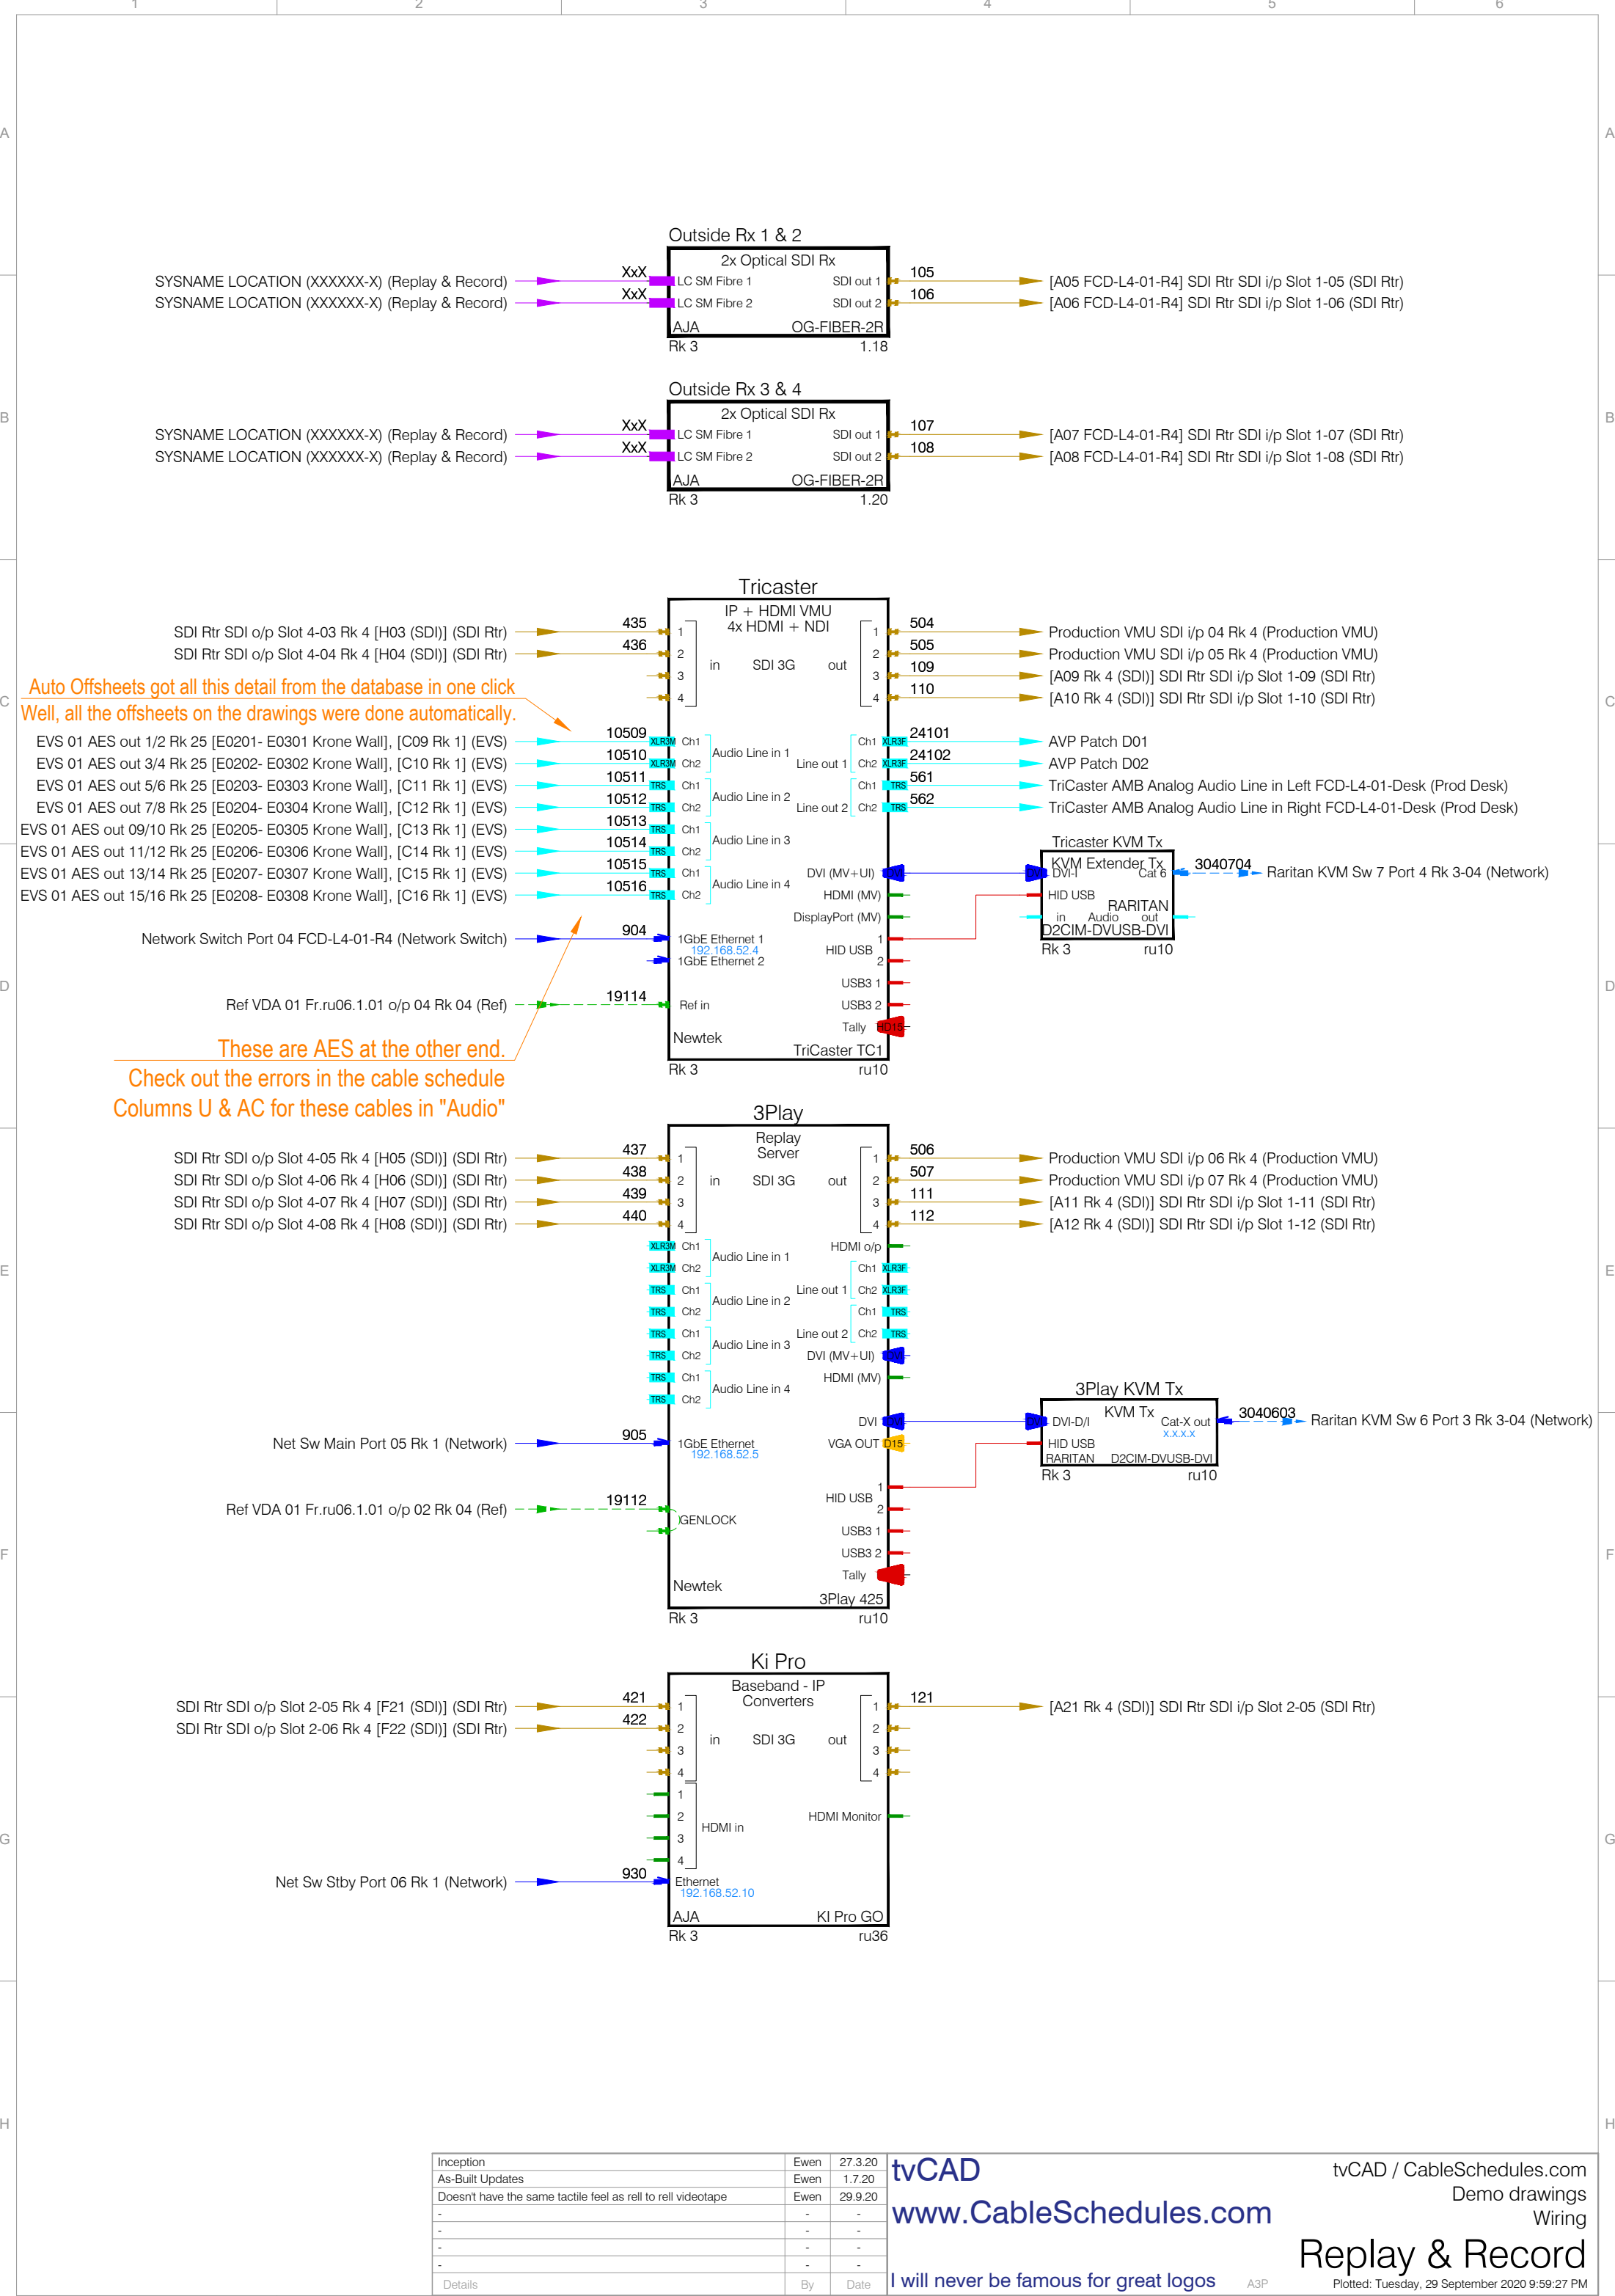

Inception	Ewen	27.3.20
As-Built Updates	Ewen	1.7.20
Indeed they did build it. Thanks to Covid, nobody came	Ewen	29.9.20
